

Subscription for GS1 Company Prefix

GS1 Company Prefix is used to generate GTIN Numbers (formerly EAN- number).

GTIN (Global Trade Item Number) is the number that provides unique identification of products. For products with barcodes, the GTIN number is expressed in the barcode.

GS1 Company Prefix is also used for transport labelling. It is part of the SSCC code and shipment/consignment number.

Please note that our prices for subscription GS1 Company Prefix are regulated each year according to the price index.

New prices can be found here:
